

DINING CHAIR AFTERCARE FACT SHEET

GENERAL & EVERYDAY CLEANING

For the general every day cleaning of your dining chairs, we recommend the simple use of a damp cloth to wipe the chair down, removing any significant surface debris.

With leather chairs this method of cleaning is normally sufficient, however in certain cases you may wish to use a leather cleaning and restorative product. For fabric chairs a light clean with a cloth using a regular solution of household washing powder is advisable.

After a period of time you may wish to add or restore that extra element of shine and lustre to the legs or frame your dining chair.

This can be achieved by simply using a regular household furniture polish. For areas of the dining chair that have minor scratches or swirl marks to the high gloss surface (Such as the legs or frame), you may wish to use a higher grade wax polish to 'level' the surface and restore the shine.

When attempting any major cleaning of your dining chairs, we strongly recommend that your cleaning products and techniques are first tested on a hidden area of the chair.
