

MARBLE TABLES AFTERCARE FACT SHEET

GENERAL & EVERYDAY CLEANING

For the general every day cleaning of your engineered marble table, we recommend the simple use of a damp cloth to wipe the table down, removing any significant surface debris.

The surfaces of our engineered marble tables are designed to be stain and scratch resistant, so they are easy to clean and respond well to everyday furniture polishing products.

After a period of time you may wish to add or restore that extra element of shine and lustre to your engineered marble table.

This can be achieved by simply using a regular household furniture polish. For tables that have minor scratches or swirl marks to the high gloss surface, you may wish to use a higher grade wax polish to 'level' the surface and restore the shine.

When attempting any major cleaning of your engineered marble table, we strongly recommend that your cleaning products and techniques are first tested on a hidden area of the table.
